

## Toyota Forklift Part

Toyota Forklift Parts - Since 1992, Toyota Material Handling inc., U.S.A., also referred to as TMHU, has been the best selling lift truck dealer in the United States. Proudly celebrating more than 40 years of performance, the Irvine, California established business provides a comprehensive line of quality lift vehicles. Resulting from their reputation of superiority, reliability, and durability, Toyota remains prevalent in this aggressive market. Quality is the keystone of Toyota's notorious Toyota Production System practiced at all manufacturing facilities, including TIEM, which is stands for Toyota Industrial Equipment Manufacturing, located in Columbus, Indiana. The majority of the Toyota lift trucks sold in the U.S.A are manufactured here.

All Toyota's manufacturing plants within Canada and the United States comply with the International Organization for Standardization or ISO 14001 standard. TIEM has been honored many times for its commitment to constant progress, and its environmental systems. It is the first and only manufacturer to offer EPA and CARB-certified Compressed Natural Gas powered lift trucks on the market. To illustrate, the Toyota 8-Series IC lift trucks emit 70% fewer smog forming emissions than the current federal EPA standards and have complied with California's strict emission standards and policies.

### Toyota Material Handling, U.S.A. - The Industry Leader

The head of Toyota Material Handling, U.S.A., Brett Wood feels that TMHU's success comes from its commitment to produce high quality lift trucks while offering exceptional customer support and service. "We must be able to learn and predict the needs of our customers," said Brett Wood. "As a leader, our success also depends on our ability to address our customers' operational, safety and environmental cost issues." TMHU's parent company, Toyota Industries Corporation, also referred to as TICO, is listed in Fortune Magazine as the world's principal lift truck supplier and is amongst the magazines impressive World's Most Admired Companies.

### New Meaning to Environmental Accountability

Toyota's parent company, Toyota Industries Corporation, has imparted an exceptional corporate principles towards environmental conservancy within Toyota. Toyota's loaded history of environmental protection whilst retaining economic viability can not be matched by other organizations and certainly no other materials handling manufacturer can thus far rival Toyota. Environmental responsibility is a fundamental characteristic of corporate decision making at Toyota and they are proud to be the first and only maker to offer UL-listed, EPA - and CARB -certified Compressed Natural Gas powered lift vehicles. Yet one more reason they remain a leader within the industry.

Toyota originally released the 8-Series line of lift trucks in 2006, again exhibiting its leadership and innovation in the industry. Featuring an exclusive emission system that eclipsed both Federal EPA emission values, and California's more environmentally friendly emission standards. The finished invention is a lift vehicle that creates 70% less smog forming emissions than the existing Federal standards allow.

Also in 2006, Toyota developed a relationship with the Arbor Day Foundation, furthering their obligation to the environment. Greater than 57,000 trees have been planted in district parks and national forests damaged by ecological causes such as fires, as a product of this relationship. 10,500 seedlings have also been distributed through Toyota Industrial Equipment's system of sellers to non-profit organizations and neighborhood customers to help sustain communities all over the U.S.

Toyota's lift vehicles offer enhanced strength, visibility, output, ergonomics, and all the foremost safety equipment that has made Toyota an industry leader. The company's System of Active Stability, also known as "SAS", helps reduce the chance of mishaps and accidental injuries, in addition to increasing productivity levels while minimizing the potential for merchandise and equipment breakage.

System Active Stability senses various factors that could lead to lateral instability and potential lateral overturn. When any of those factors are detected, SAS instantaneously engages the Swing Lock Cylinder to stabilize the rear axle. This alters the lift truck's stability trajectory from triangular in shape to rectangular, offering a major increase in stability which substantially reduces the likelihood of a mishap from a lateral overturn. The Active Mast Function Controller or the Active Control Rear Stabilizer also assists to prevent injuries or accidents while adding strength.

The SAS systems were originally used on the 7-Series internal combustion lift vehicles which were put on the market in 1999. These systems helped propel Toyota into the lead for industry safety standards. Now, SAS is adopted on nearly every new internal combustion models and is standard equipment for the new 8-Series. There are more than 100,000 SAS-equipped lift vehicles in action, exceeding 450 million hours combined. The increased population of SAS-equipped trucks in the field, along with obligatory worker education, overturn fatalities across all brands have decreased by 13.6% since 1999. Furthermore, there have been an overall 35.5% fall in industry wide collisions, loss of control, falls and tip overs from a lift truck for the same period.

Toyota's measure of brilliance reaches far beyond its technological achievements. The company maintains a widespread Operator Safety Training course to help clients meet OSHA standard 1910.178. Training packages, video tutorials and an assortment of materials, covering a broad scope of subjects-from individual safety, to OSHA regulations, to surface and load situations, are accessible through the vendor network.

Toyota has maintained a relentless presence in the United States ever since its first sale. In 2009, Toyota Industrial Equipment Manufacturing, produced its 350,000th lift vehicle. This fact is demonstrated by the statistic that 99% of Toyota lift trucks sold in America today are built in the United States.

TMHU is based in Columbus Indiana and houses nearly 1 million square feet of manufacturing facilities over 126 acres of land. Facilities include a National Customer Center, as well as production operations and distribution centers for equipment and service components, with the entire investment exceeding \$113 million dollars.

The new National Customer Center was conceived to serve both dealers and customers of TMHU. The facility includes a 360-degree showroom, a presentation theater complete with stadium seating for 32, an section for live merchandise demonstrations with seating capacity for 120; a presentation theater; Toyota's Hall of Fame showcasing Toyota's history since the birth of its creator, Sakichi Toyoda, in 1867, and finally a training center.

TMHU has 68 authorized industrial equipment dealers, along with 189 dealership locations all through the United States, offering the most complete and inclusive customer support and customer service in the industry. The company's new and Licensed Used lift vehicles, service, components, and financing features make Toyota dealerships a one-stop shop to guarantee total client satisfaction.
