

## Clark Forklift Part

Clark Forklift Part - Currently, there are over 350,000 Clark forklifts performing worldwide, and more than 250,000 operating in North America alone. With five main lines across the world, Clark is proud to be one of the most expansive companies in the industry. Heavy duty vehicles ranging from 1,500lb to 18,000lb capacities, dual fuel, petrol, LPG, hand powered trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift, handles more than 120,000 individual items intended for 20 distinctive brands of lift trucks and automated equipment. Your regional Clark Seller is your complete source for availability of all your parts needs offered by Clark Totalift.

Clark has a extraordinary Parts Distribution team. The components warehouses are conveniently positioned in Changwon, South Korea and Louisville, Kentucky to ensure exceptional service to both their customers and their dealers. For over 90 years, Clark has exceeded industry standards, being one of the most actively advancing producers. Driven to provide the highest level of value and service to our customers, Clark remains on the cutting edge when it comes to enhancing output and benefiting performance.

Worldwide, Clark has one of the most impressive supplier support networks. With over 550 locations globally, supplier representation in over 80 nations and 230 locations in North America, their high level of dedication to their clients predominates the material handling market.

Clark proudly remains an progressive leader of the material handling industry, pioneering safety features such as the worker restraint system. This exceptional commitment to safety is currently a standard feature on every forklift.

Clark has a relentless goal to possess the No. 1 quality system in the industry which is demonstrated by their commitment to ISO standards. Clark, is the first manufacturer of forklifts and lift vehicles to be internationally certified with quality standard ISO 9001 in all of its production plants. Additionally, the ISO 14001 Environmental Conservancy System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement enables Clark to be prepared for any environmental limitations, thus placing them in a dominant industry position.

Clark has selected the very economical and advantageous system of "Lean Manufacturing" for its assembly plants and use of resources. This system was established to acknowledge the most successful approaches of manufacturing plant management and ensuring maximum proficiency. Clark has concluded this transition of its Korean facility. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and production efficiencies.

By working together, Clark's product suppliers and engineers communicate towards enhancing product efficiency while minimizing expenses. The contemporary value engineering program combines progressive product improvement and provides superior consumer support and service within the industry.
