

## Aerial Work Platform

Aerial Work Platform - There are a lot of attachments intended for lift trucks which could be utilized in order to help expand the capabilities of your lift truck and allow you to lift things, handle materials with greater ease or to accomplish clean-up tasks.

Several accessories were specifically intended for the forks themselves. For example, fork extensions can be utilized whenever you need much more fork length, that increases lifting capability. Blade extensions come in lengths ranging from forty eight to one hundred twenty inches. Rounded or triangular accessories are one more kind utilized when moving rolled material so as to make sure it does not roll off of the traditional flat forks.

Lifting attachments can be pivoting and telescoping crane accessories. They come in various styles. These attachments are normally meant for moving poles, lumber, metal bars or whatever sort of bulky objects. Additional accessories such as different kinds of hooks and hook plates are existing to be able to lift stuff making use of a chain or sling. Magnetic lifters and slab lifters are other things that can be used together with hook attachments. Slab lifters are specialized accessories which are used for lifting various materials which are delivered in a slab or sheet format. Carpet poles and rug rams are other lifting tools which attach to your lift truck so as to make transferring rolls of carpet easier. The attachment connects onto the lift truck's blades and has a pole that goes through the center of the carpet roll.

There are several different types of lift truck attachments which could be used for facility maintenance such as snow blades. These blades connect to front end loaders and can transport materials such as dirt, soil and snow. Other popular cleanup accessories consist of magnetic sweepers and standard sweepers. Standard sweepers consist of a broom which the forklift forks connect onto for sweeping big spaces such as factory floors, parking lots and warehouse. The magnetic sweeper is the same except that it has a magnetic plate rather than bristles. The magnetic sweeper is used in places where there is lots of metal fragments like on shop floors for instance. Sweepers have widths up to 60 inches and this surface area makes clean up easy and quick.

A material spreader is one more forklift attachment that is normally utilized at facilities. These spreaders are useful for various applications like for example spreading rock salt, pellets, fertilizers, insecticides, seed and ice melt.

Work platforms are another optional lifting attachment which many businesses use everyday. The platforms range in size from 36" x 36" to up to 60" x 60". There are some units accessible which are capable of folding up and storing into a smaller space. Work platforms are designed to raise employees up to an overhead location making use of the forklift. Larger platform units have added space for employees to bring tools and other essential things for the job. Usually work platforms are constructed of poly material or steel.
